Your guide to our visual identity

unisa

University of
South Australia

The University of South Australia strives to achieve visual continuity across the wide range of its communication activities. These activities include publications, stationery, electronic media, merchandise, displays and signage. A consistent visual identity provides for easy recognition and helps to build the University's marketing brand. This brochure outlines the rules and guidelines which, when applied consistently, will aid in the achievement of these aims.

The Logo

Composition

The logo comprises the crest and the name University of South Australia or UniSA. The crest should only ever be reproduced as a part of the logo in combination with the name of the University.

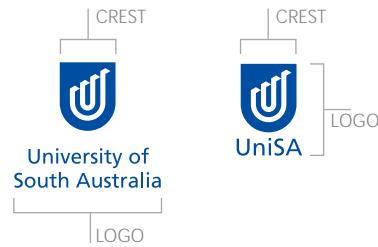

The name of the University should always remain proportional to the crest.

There are six logo versions. The logos can also be reproduced in reverse.

The typeface used for the logo is Frutiger. Graphic designers should not reset the type as this may produce variations in character weight, spacing or errors of computer font substitution. The logo must be reproduced using original artwork such as an electronic graphic file or scanned bromide.

Positioning of the logo

The logo should not be used in a visually congested or confined manner, e.g. surrounded by a border or tightly positioned with other material. A 'zone of exclusion' exists around the logo. This zone is determined by the dimensions of the logo and should be at least 50% of the width of the crest.

The crest

The crest is a solid, simple and distinctive design that promotes memorability and easy recognition. The shield is shaped and based on the letterform "U", the 'uplifting' forms express aspiration to higher achievement. The internal structure can be interpreted as 3 dimensional, further increasing visual interest.

The crest and/or its elements is not a device for decoration nor is it to be used in repetition to create a pattern, as a template in which other material is presented or as a background over which text is reproduced.

It should not be computer enhanced e.g. represented in 3D perspective. The crest should always be reproduced as a solid colour - not reproduced as a tint or a vignette.

Colours

The logo is normally printed in Reflex Blue on a white background, but a white logo on a background of any of the three corporate colours may also be used. For one colour (black) printing the logo may be reproduced in black.

Where the background colour of a printed document is an image or colour other than the corporate colours, the logo should be reproduced in Reflex Blue with the internal "U" elements in white. Alternatively the logo can be produced in white with the internal "U" elements in Reflex Blue.

When set against colour backgrounds, the crest element of the logo should not be defined by a contrasting keyline.

The logo may also be reproduced in metallic silver or gold.

reproducing the logo on a corporate colour background

using an image as a background and reproduced in reverse

Typography in literature

The official University typeface for use in all forms of literature, including official correspondence, documents, reports, media releases and brochures is Palatino. The 'Roman' weight is for normal use, 'Bold' for headings and 'Italic' for special emphasis within text. The typeface must not be extended or condensed. If Palatino fonts are not available within computer applications then Times New Roman is acceptable.

For promotional communications the Frutiger typeface should be used. Where Frutiger is used no other sans serif typeface may be used. While Frutiger is not readily available on University computers, the typeface is accessible to graphic designers.

Palatino Roman Frutiger Roman

Palatino Bold **Frutiger Bold**

Palatino Italic *Frutiger Italic*

Using UniSA

The 'UniSA' logo version is designed to be applied to signage, merchandise e.g. caps and t-shirts and in printed promotional communications where stronger branding is required. The UniSA logo is more compact than the other logo versions and as such can be reproduced with more weight and greater text legibility within the allowed space.

UniSA as an acronym is acceptable for use in body text. The first reference to the University should be in full (i.e. University of South Australia) and thereafter the University may be referred to as UniSA or the University.

'UniSA' as an acronym of University of South Australia should not be used in international communications, as the University could be confused with other organisations using the same acronym internationally.

Capital letters should be included in the acronym 'UniSA' when it appears as text in any document and when it appears with the crest as part of the University logo. The all-lower-case 'unisa' is a typographical treatment used as a design feature of this suite of brochures and should be used only as set out in this document.

The positioning statement and slogans

The University's positioning statement is 'Educating Professionals, Creating and Applying Knowledge, Serving the Community'.

The University uses slogans in conjunction with its various marketing campaigns. Information on slogans can be obtained from the Marketing and Development Unit.

Secondary logos

In some cases a secondary logo may be used to identify or brand an area of the University. Secondary logos are sanctioned for use by the University Marketing Committee via the Director, Marketing and Development Unit.

When applied, sanctioned logos must be less prominent than the University logo. A secondary logo must not encroach the zone of exclusion of the University logo.

Joint ventures

Where collaborative or joint ventures require more than one logo to be printed on any material, the UniSA logo must be equal in size and prominence to the presentation of the partner institution. UniSA must not be smaller or less prominent.

Incorrect usage of the logo

do not reproduce the logo as a vignette or stipple

do not reproduce the logo with a keyline

University of South Australia

do not change the proportions of the logo elements

University of South Australia

do not change the positions of the logo elements

*for stronger branding and best legibility
or
using a logo in very small areas*

Stationery

University stationery follows a standard design. Document Services can supply University stationery, including business cards. Examples of stationery are shown below.

Electronic templates for computer-generated communications can be downloaded from www.unisa.edu.au/mdu/forstaff_designcopystd.htm

Advertising

All University advertising is placed through the University's contracted advertising agency to a format prescribed by the Marketing and Development Unit. For assistance please contact the Advertising Coordinator.

International communications

The ESOS Act 2000 requires that all advertising, promotional and marketing materials for international prospective students must contain the University's CRICOS provider number: 00121B.

Although certain marketing materials may be aimed at what is considered a domestic market, domestic markets include potential international students, eg. Yr12 international students, undergraduate and postgraduate degree students studying either at UniSA or other institutions, all within Australia.

Please consult with the Promotions and Communications Officer, UniSA International on all marketing materials to be used.

Use of logo by other entities

Use of the University logo by other entities requires the permission of Alan Brideson, Director Marketing and Development or his delegate.

Signage

The Property Unit determines standards as they apply to signage.

All signage shall conform to the Campus Signage manual (available at www.unisa.edu.au/pro/signagemanual). The manual details step-by-step instructions for requesting signage.

University seal

The University seal is used to certify documents such as parchments, memoranda of understanding, agreements and other legal documents or products that require signatures and authorisations.

The seal can also be applied as artwork in some circumstances. Permission to use the seal design should be sought from the Office of the Vice Chancellor.

Publication design standards

University publications fall into three major categories.

1. Corporate communication

Publications that present information about the University usually associated with brand management or mission.

Level 1

University-wide

Division

School or Unit

3. Student recruitment publications

Publications that promote the University's programs and services to prospective students.

Level 1

University-wide
aggregate program info
from all Divisions

Level 2 Division

Level 3 School or Suite of
Programs

Level 4 Single Program
or service

2. Research

Publications that have information about the University's research activities and capabilities.

Level 1

University-wide

Research Institute
Centre, concentration
or group

The samples shown on this page document the standards on which the design of the Corporate Communication covers should be based.

Corporate communication

There are three levels in this category, all three levels use a distinctive metallic blue (PMS 8183) background. The image for the background should reflect the content of the individual publication, with a strong emphasis on diagonals. The colour images in the four

squares should also reflect the content of the publication. This enables each publication to reflect the corporate style and the flexibility to give each publication its own identity.

Corporate Communication Level 1 University-wide

Corporate Communication Level 2 Division

Corporate Communication Level 3 School or Unit

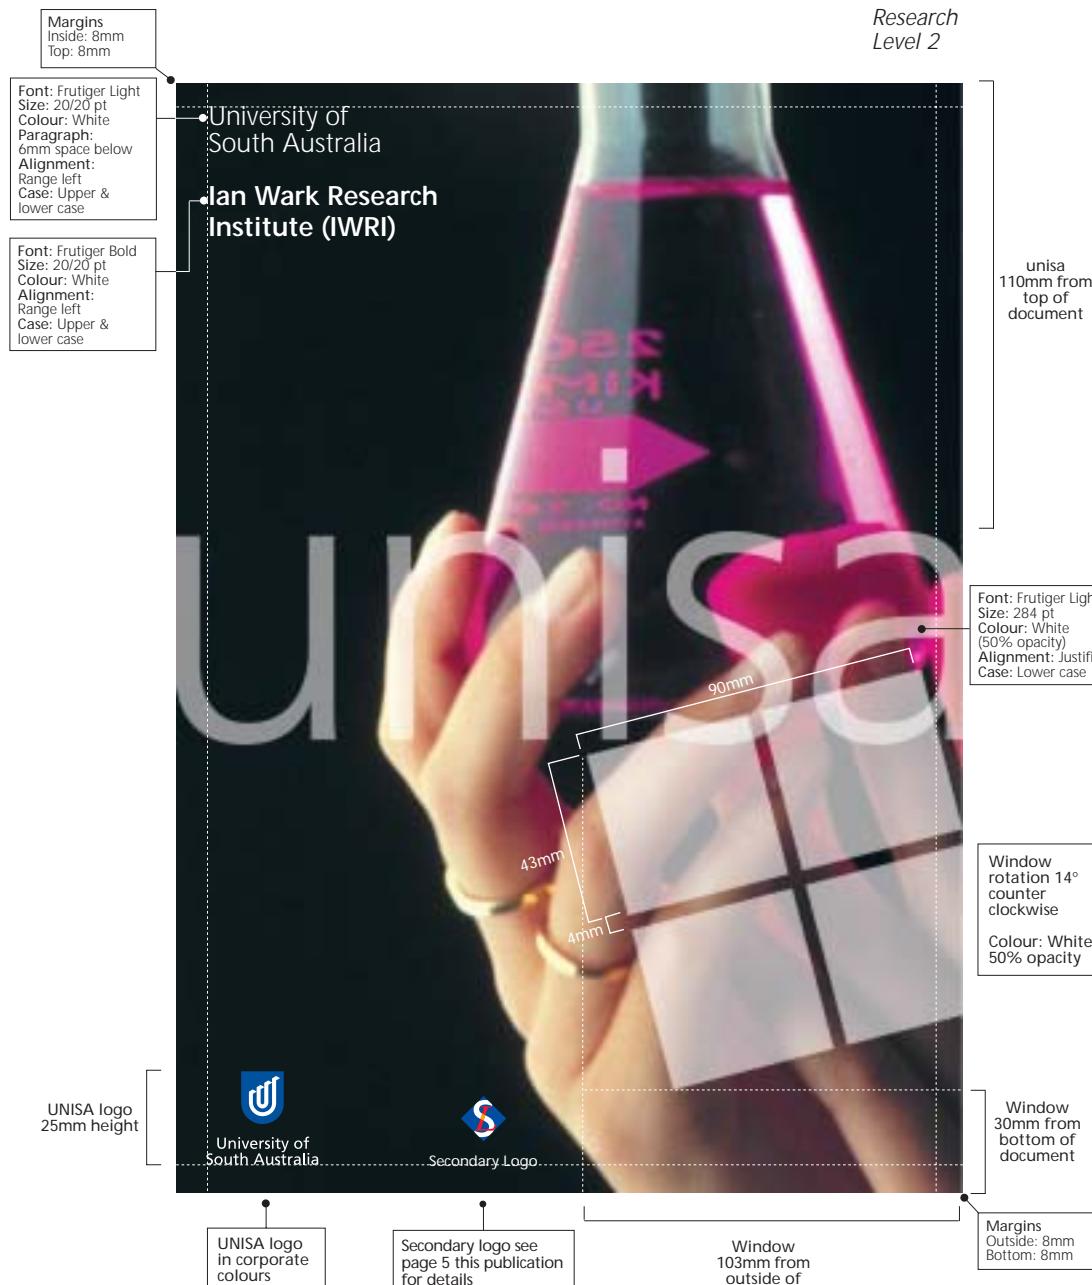

Research

There are two levels in this category. Level 1 has a full colour background image with four colour images in the four squares that should all reflect the content of the publication. Level 2 has a full colour background

image and the four squares are ghosted to 50% with the background image still visible. See main image this page.

The samples shown on this page document the standards on which the design of the Research covers should be based.

The samples shown on this page document the standards on which the design of the A4 full-colour leaflets should be based.

Multi purpose full-colour leaflet

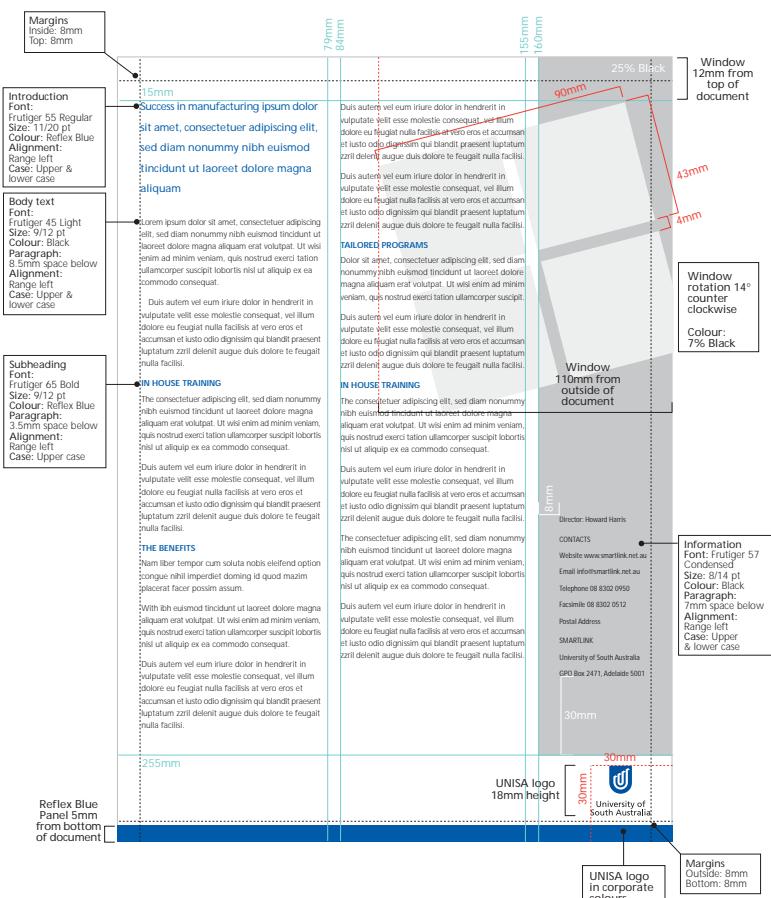

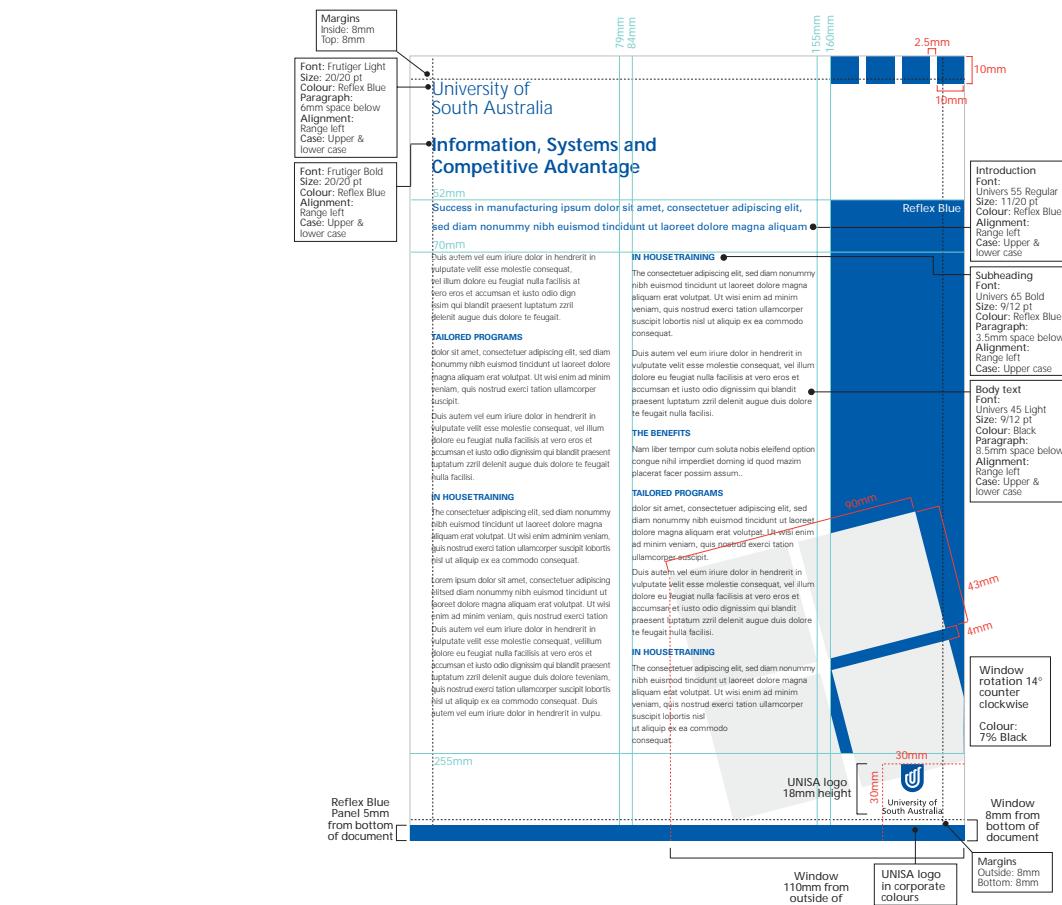

This is a full-colour, double-sided single A4 leaflet that combines text with colour images. The leaflet can be used for various purposes.

Multi purpose two-colour leaflet

This is a two-colour (reflex blue and black) double sided, single A4 leaflet.

The samples shown on this page document the standards on which the design of the A4 two colour leaflet should be based.

The Marketing and Development Unit can provide assistance in the production of publications.

- **Photographs**

A photo library is maintained at MDU, containing high-resolution images which are available for use in University publications. The photos are in digital format and copies can be supplied on CD. Low resolution images are also available on

www.unisa.edu.au/images_library/forstaff_imagelib.htm

- **Logos**

The University logo can be downloaded in JPG format from [<http://www.unisa.edu.au/mdu/forstaff_logodown.htm>](http://www.unisa.edu.au/mdu/forstaff_logodown.htm). For high-resolution TIF copies of the logo, contact MDU.

- **Designers, Photographers and Printers**

A number of independent businesses are used to design and print University publications. MDU can provide designer or printer referrals to staff who wish to outsource these services.

MDU is interested in seeing any publications being produced within the University and is happy to provide feedback on any aspect of document publication. For assistance, contact the Publications Coordinator on 8302 0969.
